

THE CHRONOLOGY OF JOSEPH

Gen. 41:46
45:6 Joseph was 30 at the beginning of the 7 years of plenty. It was 9 years later (2 years of famine had passed) when Joseph brings Jacob to Egypt. (This would mark the beginning of Israel's 215 years of Egyptian sojourning.)

Therefore: $30+9=$ Joseph's age at the entry of Israel into Egypt.

The exodus was 215 years later in 1615 BC (2513 years after Adam's creation.)

So, 215 years earlier would have been 1830 BC — the year Israel (Jacob) entered Egypt when Joseph was 39. (Jacob was 130 at the same time — Gen. 47:7)

Therefore: Joseph was BORN in 1869 BC.

Gen. 50:22 Joseph DIED when he was 110. So his death would have been in 1759 BC.
